

DIRECTOR CUT

Virtual reality Gaming

Direct your own virtual Movie.

Presentation

Concept.

I see big potential with this new pioneer product. by using new virtual reality technology, you can develop a new virtual reality platform where people can direct their own virtual film, in a form of a new social interactive game, this can be used by mobile, and later you can also roll as a VR game (via a VR goggles that you can direct your own scenes, but also famous scene, linked to your mobile). see below the game tutorial.

Businessmodel.

The business model is our users who play the game, If you think in longer term, you can also work with motion picture studios and filmmakers, production companies, for example to add new movie scenes in the game, but also other content, this provides new opportunities for **promotion, advertising, brands, marketing, distribution models of your new movie or other content**. So you interact with our user of the game, users can win tickets again for premieres and other exciting prizes with brands.

What I try to do here is pioneering this may lead to new business models in the creative and digital industries.

Viewborgg.

Viewborgg is the inventor, developer of the virtual reality game Director CUTT. Virtual reality is developing so fast that the 3D and mixed reality graphics become more realistic, we integrate more and more new features and options in the game. think of voice recognition technology has been linked to the virtual reality game.

Partners.

Viewborgg will also work with partners such as brands, filmmakers, studios, marketing and media companies to integrate content into the virtual reality game that offers new opportunities in the field of advertising.

Viewborgg will also develop and launch new virtual reality game projects. But but now we focus on our virtual reality project Director CUTT, a pioneering project.

Platfromen.

Directors Cut is a game for Mobile and VR.

you can follow friends, so you can see the latest updates of their project. you can set up a project together. anything is possible.

People can also create own stories and add their own movie.

Create and Direct your own virtuality movie thats is the idea.

Splash Screen (Storyline) interactive How to play.

You choose a storyline where you want to go to work as a director, each story line is linked to a film budget.

2^e: Casting

In casting you get started, you're going to select the actors for your film.

3^e: Movie Locations

You can now choose from various film locations, which fits into the storyline.

The beginning of the game.

Now you need to record different scenes to complete your movie, you have different scenes in different locations every scene you have to carry out orders, to complete the scene. you continue to the next movie scene.

The commands may vary each time, an example, the electricity is out: what you gonna do? are you going to hire an emergency generator? or you just wait until electricity does it again. but one thing you have to memorize is. **Time is money!**

Deadline.

Each scene has a deadline, you must complete the scene within the given time. if you fails then you have to start all over again with the scene.

If you do this scene rounding within certain time. you earn money, the faster you rounding the scene. the more money you can earn.

Money.

With the money you earn you can invest again to buy beautiful film locations, you can also buy weather conditions, you want it in your movie scene goes rain or you want sun shines. (Anything is possible)

You can also rent your equipment or you sell your equipment where you can again make money. You can also rent equipment from your friends.

At the end you can watch the movies, and share with your friends, there is also a top 10 rating where you can how many people have liked that others videos en or watch virtual other short video's.

Social Gaming.

Friends can also help and invest in your movie. eg borrow your film equipment or sponsor. They can also advise you if they can themselves co-director to work on your movie. a community of friends you can work on your movie.
