## Our Service

Pageonce, the leading Personal Productivity Assistant, is your one-stop-shop for online account management on your BlackBerry, iPhone, or your computer's web browser. In a world where quick and up-to-date access to your online account information is crucial, Pageonce gives users the only mobile Internet experience free from the hassles of logins, password amnesia and the weariness that comes with navigating the same sites over and over and over again. Using the powerful patent-pending Fetchonce™ technology, Pageonce allows you to access all your online accounts, password-free, via your mobile phone or your web browser – anytime, anywhere.

With Pageonce you can simultaneously access, view, and manage the information from your personal accounts in these popular categories – finance, shopping, utilities, and travel. Not only does Pageonce make your information available to you in easy-to-read screens, but Pageonce enables you to easily and proactively manage your accounts, with in-app update feeds and optional email alerts that notify you to changes in your accounts and upcoming events in your life: bill due dates, financial balances summaries, recent credit card transactions, approaching travel itineraries, package delivery dates and much more. Pageonce consolidates all of this information for you in one place on a daily basis so you don't have to.

## How it Works

Whether you are on your BlackBerry, your iPhone, or your computer's web browser, all that's required to register with Pageonce is a valid email address, maintaining your anonymity at all times. Once registered, users can begin adding their accounts. Pageonce connects you to thousands of online accounts and pulls the most pertinent data from each account to your Pageonce dashboard. You can see your bank account balance, snapshots of your investment portfolio, recent credit card transactions, the next DVD scheduled to arrive from Netflix, up-to-date cell minute usage, your upcoming flight travel itinerary, and much more.

The convenient alerts section of your account provides a quick summary of the most current activity. Users also have the option to choose to have certain alerts delivered via email, enabling you to even more proactively manage your online life, guard against fraudulent or suspicious account activity, and stay abreast and in control of your perpetual "to-do" list.

### *Key Benefits*

Pageonce, the free Personal Productivity Assistant, has become a lifesaver to thousands of iPhone and BlackBerry users just like you. With Pageonce you will:

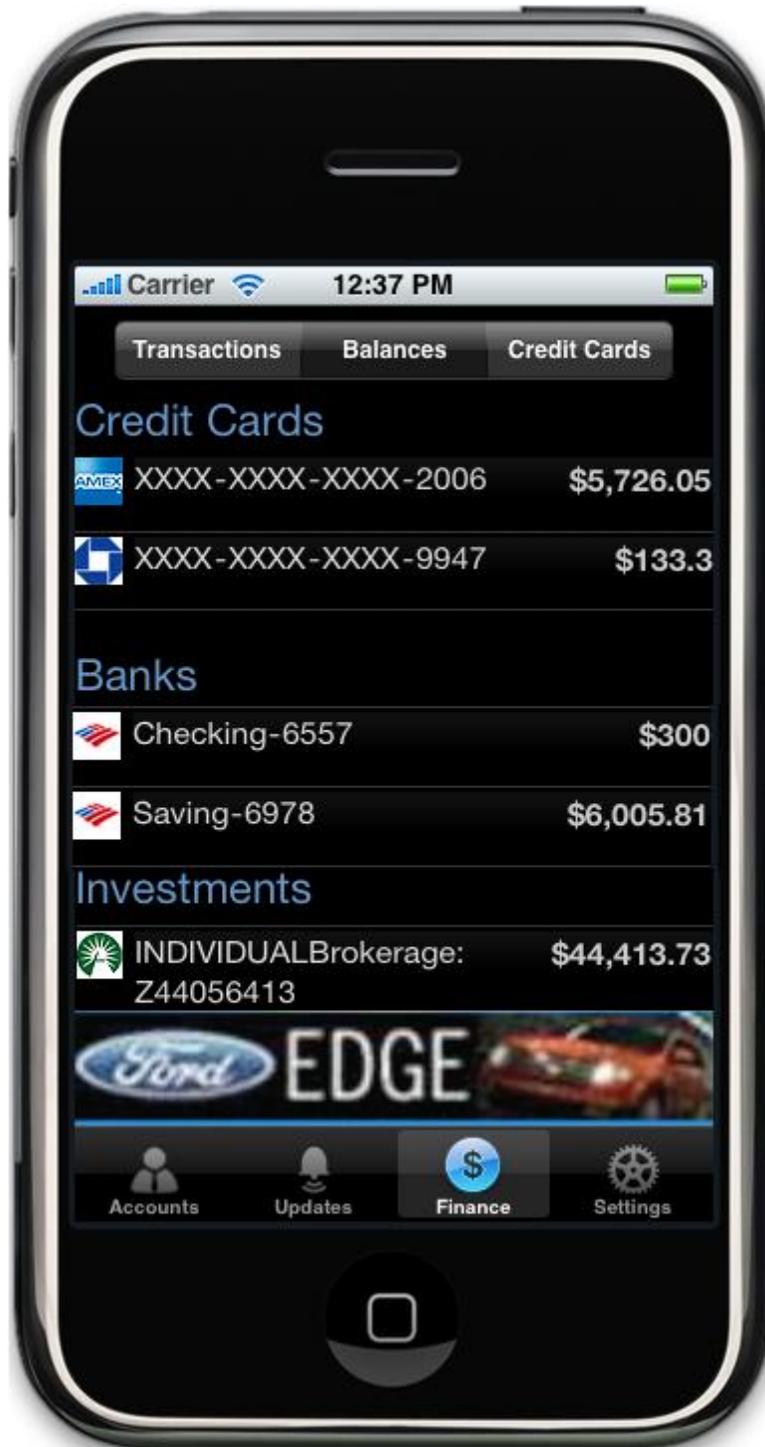

- Always have a clear financial picture of bank balances, credit card limits and investments
- Avoid late fees by knowing when bills are due and paying them on time
- Enjoy on-the-go access to all your personal information with Pageonce on your iPhone and Blackberry
- Cure password amnesia forever by linking directly to all accounts from Pageonce
- Defend against identity theft & online fraud by being aware of account statuses in real time
- Never exceed cell phone minutes or text messaging limits thanks to Pageonce alerts
- Manage all family members' frequent flyer accounts from one place
- Track purchases from Amazon, eBay and Costco
- Know what's coming next from Netflix and be the first to get the latest new release
- Increase the security of your Internet accounts by assigning different usernames and passwords to each account and managing them directly from Pageonce
- Have the ability to call customer service for any account provider with a single click
